

5 SMALL CHANGES THAT CAN MAKE A BIG IMPACT

Transportation

Uber Green

CLEANER RIDES IN YOUR CITY

You can choose an EV for your Uber or Lyft in some cities. Within the app look for “Uber Green” or “Green Mode” in Lyft.

Waste Management

COMPOST IN YOUR COMMUNITY

You can keep food waste out of landfills by finding local composting options. Use Litterless as a resource to search options in your area or contact your local waste management company.

Litterless

Gardening

Native Plant Finder

GARDEN FOR THE PLANET

Planting native species supports local ecosystems and pollinators. Use [NWF's Native Plant Finder](#) to get started.

Water Conservation

CHECK THE WEATHER BEFORE WATERING

Watering your lawn or garden right before it rains is one of the easiest ways to waste water, try basing sprinkler timers on the weather report or using a smart irrigation system (like Rachio, Netro Home, or Orbit B-hyve).

Mindful Consumer

RETHINK BEFORE YOU CLICK “BUY”

Fast shipping and cheap items come with hidden environmental costs, including increased carbon emissions, excess packaging waste, and overconsumption of resources. Try slowing down your shopping habits by choosing quality over quantity, supporting sustainable brands, and consolidating orders when possible—your wallet and the planet will thank you.
